CRANE BS&U ENERGY POLICY STATEMENT 2023

Crane Building Services and Utilities (Crane BS&U) have set out to commit organisational resources to energy management for the purposes of minimising emissions, environmental impacts and costs. Where possible, the business shall work towards using energy from renewals/sustainable sources in all of our operations and facilities throughout the world.

In order to support and meet with the above commitment, the company shall:

- Comply with the requirements of environmental legislation and approved codes of practice in all regions in which we operate;
- Continually seek opportunities to improve environmental and social performance;
- Reduce emissions and wasted energy in all forms;
- Give a high priority to energy management and investment in efficient energy drives and devices to continually reduce our energy consumption;
- Monitor energy use and target energy reductions in all facilities and operations;
- Identify short, medium & long-term investments in more energy efficient technology and renewable energy sources;
- Create and maintain a sustainability team including key stakeholders to raise awareness, encourage participation, and drive a strategy of enhanced corporate citizenship.

This commitment is endorsed by the Group President, and supported by Site Leaders in all facilities controlled and operated by Crane BS&U.

Chris Gray
Group President
